Kerr
Sybron Dental Specialties

Friday, March 30, 2012

17th District Dental Society
2201 South Danville Drive
Abilene, TX 79605

Presented by
Dr. Robert
Lowe

Dr. Robert A. Lowe graduated magna cum laude from Loyola University School of Dentistry in 1982 and was an assistant professor in Operative Dentistry until its closure in 1993. Since January of 2000, Dr. Lowe has been in private practice in Charlotte, North Carolina.

Dr. Lowe lectures internationally and publishes in well-known dental journals on esthetic and restorative dentistry. He is a clinical evaluator of materials and products with many prominent dental manufacturers.

Dr. Lowe received fellowships in the AGD, ICD, ADI, ACD, and received the 2004 Gordon Christensen Outstanding Lecturers Award at the Chicago Midwinter Meeting. In 2005, he was awarded Diplomat status on the American Board of Aesthetic Dentistry.

The Speaker will receive an honorarium for this program.

Program funding provided by Kerr Corporation and Midwest Dental.

Kerr® Corporation

Kerr Corporation is an ADA CERP recognized provider

ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Kerr Corporation designates this activity for 6 continuing education credits.

AESTHETIC OVERHAUL FROM BASIC TO "CUTTING EDGE" - Technologies and Techniques That Will Change Your Practice

Today modern technologies such as sonically placed bulk fill composites, Zirconia and Lithium Disilicate (E.max) ceramics, CAPTEK™ periodontal crowns, and hard and soft tissue dental lasers to name a few, are revolutionizing the way we deliver esthetic and functional dental treatment. Restorative materials continue to be developed and refined that allow for the creation of lifelike esthetics that are virtually indistinguishable from natural teeth, however, the artistic ability of the dentist can still be the limiting factor on their optimal use. Unleash the artist within! Learn how these and other revolutionary technologies along with precise and proven crown and bridge techniques can elevate your standard of practice.

COURSE OBJECTIVES:

At the completion of this lecture, each participant should:

1. Learn about the advancements in direct posterior restorations, including the evolution of techniques and materials
2. Learn techniques to create predictable proximal contacts using sectional matrix systems
3. Understand the use of all ceramic systems and ceramometallic restorations in various clinical situations

DATE: **Friday, March 30, 2012**

TIME: 8:30am - 9:00am Registration
9:00am - 4:00pm Lecture
